TOXIC SUBSTANCES REGISTRY SYSTEM

Index of

Material Safety Data Sheets

INTRODUCTION

The Material Safety Data Sheets (MSDSs) listed in this index reflect product inventories and associated MSDSs which have been submitted to the Toxic Substances Registry database maintained by the Base Operations Contractor at the Kennedy Space Center. The purpose of this index is to provide KSC government, contractor, and tenant organizations a means to access information on the hazards associated with these chemicals.

The Toxic Substance Registry Service (TSRS) has been established to manage information dealing with the storage and use of toxic and otherwise hazardous materials at KSC. As a part of this service, the BOC Environmental Health Services maintains a central repository of MSDSs which have been provided to TSRS.

The data on the TSRS are obtained from NASA, contractor, and tenant organizations who use or store hazardous materials at KSC. It is the responsibility of these organizations to conduct inventories, obtain MSDSs, distribute Hazard Communication information to their employees, and otherwise implement compliance with appropriate Federal, State, and NASA Hazard Communication and Worker Right-to-Know regulations and policies.

KSC MSDS SYSTEM OVERVIEW

DESCRIPTION

The KSC MSDS (Material Safety Data Sheet) System has been developed under the direction of the KSC Biomedical Operations and Research Office by BOC Environmental Health Services Toxic Substances Registry System (TSRS), with support from the KSC Supply, Transportation and Services Division and BOC Logistics, and is being made available for use by Kennedy Space Center personnel.

This system is a database of MSDS's acquired from manufacturers, distributors, vendors, and KSC organizations, for products used and stored at KSC and CCAFS. It is a PC-based system, running under a Windows environment and SQL database management software, utilizing optical disk storage for the document images.

Access to the system is via KSC computer networks. MSDS requests may also be made via touchtone phone for transmittal to a local facsimile machine, using MSDS numbers obtained from the GP23-1 index which is published quarterly.

ACCESSING THE SYSTEM

Refer to the attached instructions for using the Dial-A-File facility which enables phone-FAX MSDS requests.

If you are using a workstation rather than Dial-A-File, or want to request access via a workstation, see the attached instructions for online utilization of the KSC MSDS System.

ACQUISITION OF MSDS'S

Acquisition of MSDS's is the responsibility of each organization's designated personnel. A list of contacts is provided with the GP23-1 report. Changes to the list of contacts should be provided to TSRS at BOC-022, or call 867-9014.

DISTRIBUTION OF GP23-1 REPORTS

Distribution of the reports will be to each organization's contact(s) for re-distribution within the organization. If the number of reports you are receiving does not meet your needs, provide corrected numbers to TSRS personnel. You may reproduce the report if you need additional copies.

SUBMITTAL OF MSDS'S FOR THE MSDS SYSTEM

Before submitting MSDS's to TSRS for entry into the MSDS System, check the index (GP23-1) or the database. If the MSDS of the same revision date is already available, submit, on KSC Form 7-599, "MSDS/Index Key Submittal Data" (sample attached), only the key information you want added to the database. For MSDS's not currently in the MSDS System, complete KSC Form 7-599 and submit it with the manufacturer/vendor's original MSDS or a complete, clearly legible, unmarked copy to TSRS at BOC-022.

PROPRIETARY MSDS'S

MSDS's marked as "confidential", "proprietary", or other equivalent terms are not available via Dial-A-File. Personnel with access to a workstation may view them. Permission for distribution, or a non-proprietary MSDS, should be obtained from the manufacturer.

BINDER FOR GP23-1 (MSDS INDEX REPORT)

The KSC stock number for a 3" 3-ring white binder with clear plastic overlay for insertion of cover page, which will accommodate the GP23-1 index currently, is 7510-01-277-6458.

KSC MSDS SYSTEM ON-LINE USE

USING A WORKSTATION TO ACCESS THE MSDS SYSTEM

If you are using a workstation to search for MSDS's that have been added since the last index was published, you should become familiar with general Windows conventions and with Identitech's "FYI User's Guide" for Version 1.1. Log on to the system according to the instructions provided at the time access to the system was set up.

SEARCHING

If you know the manufacturer, begin by retrieving the manufacturer folder (refer to the section on opening a folder) and scrolling through the list of MSDS's retrieved for that folder. It is very important to search the imager for the MSDS by manufacturer name, tradename, and chemical name or synonym or other appropriate keys if the previous searching is not successful. When using the following search techniques be sure to leave one space between the search command and the search criteria. The search commands may be used in any field. For additional information on search commands refer to page 23-30 of the FYI User's Guide.

- * **BW**-This stands for Begins With.
The computer will search for everything in that field that begins with what was entered for the search criteria.
- * **EQ** - This stands for Equal.
The computer will search for exactly what is entered for the criteria. Use this search strategy for retrieving the **current MSDS** by the TSRS ID.
- * **CONTAINS** - This is the most time consuming of all the search commands. Use it only when absolutely necessary. Limit your search by specifying a manufacturer or other additional criteria when using it. The entire field is searched character by character for the specified value. This is useful when searching the chemical remarks field.
- * **EW** - This stands for Ends With.
The computer will search for everything in that field that ends with the given search criteria.
- * **■** - If there is more than one word needed for the

search criteria, enclose the string in quotes (").

In general, your search strategy should use **BW** (Begins With) rather than **EQ** (Equals), unless you are absolutely certain of the way the data is entered.

There is a limit on the total number of records which can be retrieved from a single folder. The number of records in some folders exceeds this limit (Fisher Scientific is an example). In such instances, you must specify one or more additional search keys. This would usually be a tradename key, such as **BW POTASSIUM**, or **CONTAINS ACETIC**.

If you search by chemical name, remember that no commas are used when entering data and hyphens are used in their place, so that to retrieve 1,1,1-trichloroethane, you would search for **BW 1-1-1**.

If you know the manufacturer's name (for example, Olin) you may search on the manufacturer field for **BW O**, which will retrieve all manufacturer folders beginning with the letter O, or for **BW OLIN**, which will retrieve all variations of Olin, e.g., Olin Chemical, Olin Matheson, etc. You may then choose the appropriate folder in order to list the documents contained in that folder.

If you have the TSRS ID number, from the GP23-1 report or your printed inventory from TSRS, you may search by **EQ #####** (Equals TSRS ID #, using the five-digit number). If you search the TSRS ID field by **BW #####**, you will retrieve all revisions of that TSRS ID number; old revisions have an asterisk (*) after the TSRS ID.

The listing of MSDS's for the commodities distributed at KSC/CCAFS by **BOC** Propellants may be retrieved at a workstation by searching on the distributor field for **BW BOC** (Begins With **BOC**). These include the various hydrazines and nitrogen tetroxide, other fuels, scrubber solutions, solvent 113, gases, cryogenic hydrogen and oxygen, etc.

ICONS

The icon with the eye glasses (SEARCH) is used to search for folders and documents. This is referred to as a point-and-click button. Use the mouse to point-and-click on the icon to begin a search or to enter the search command of your choice in the necessary field(s).

The icon with the hand holding the file folder with the tab (RETRIEVE FOLDER) is used to select a manufacturer folder from

a list of manufacturers retrieved as a result of a search for manufacturer names. Highlighting the desired manufacturer and clicking on this icon will choose the folder and cause the list of documents contained in the folder to be listed.

The icon with the hand holding the document with the folded corner (RETRIEVE DOCUMENT) is used to retrieve a specific document (MSDS page) from the list of documents retrieved for a specified manufacturer. Highlighting the document and clicking on this icon will cause the specified document to be retrieved for viewing. Only one document at a time may be retrieved for viewing.

For information on additional icons refer to FYI User Guide page 8-9. After entering the search command or choosing the appropriate icon enter the search criteria in the selected field. For example: if the company for which you are searching is E & M Manufacturing, use the search command **BW** in the manufacturer field and enter "**E & M**" following the command and then press the enter key or click on the eye glasses to begin the search. If the manufacturer/folder is not found it is necessary to search by all variations of the manufacturer name. In this case we would begin a new search for E & M Manufacturing but we would change the search criteria to **E&M**. Notice that this time there is not a space in the name E&M. Each variation must be searched to avoid duplication. Alternatively, you may search by **BW E** to retrieve all manufacturer names beginning with the letter E, and then highlight and click on E & M Manufacturing to list all the MSDS's contained in the folder.

OPENING A FOLDER

After locating the correct folder it may be opened in three ways:

- 1) Click on the icon that contains a picture of a folder with a hand on the cover.
- 2) Double-click on the manufacturer name that has appeared in the bottom corner window of the screen.
- 3) Use the arrows above the manufacturer field to manipulate position of the highlight bar in the bottom corner window. Then double click on the highlighted bar in that window.

PRINTING

In order to select more than one page for printing, highlight each desired page one at a time by clicking the mouse button while holding down the shift key. When printing, be sure that a specified range of documents (pages) is selected. Select **Utility, Object Print, and Current Selected Documents**, and click on OK. **Never** select Current Folder; if the current folder is large, printing the entire folder could tie up the computer for many hours. Note that not all workstations have print capability. Those which cannot print may use the Dial-A-File facility to receive hardcopies at a local facsimile machine. The MSDS document window must be open in order to print. Use **F9** to open the window.

FAXING

Choose **Program Manager** (hold down **Alt** and press **Tab** until **Program Manager** appears), **Main, Control Panel, Printers**. Select the **GammaFAX** option; you must **double-click** to select it as default. This option should now appear under Default Printer. Close the windows and return to the MSDS System. (Repeat the process to return to printer mode, selecting the printer option instead.) The MSDS document window must be open in order to FAX. Use **F9** to open the window. Now when **Utility, Object Print, and Current Selected Documents** are selected, the GammaFAX option will be available instead of the printer option.

REQUESTING ACCESS

For view-only access to the MSDS System of KSC Material Safety Data Sheets on the BOC Local Area Network, the following computer equipment is needed as a minimum:

Computer Equipment:

- 386/33 Mhz computer w/4Mb RAM
- VGA monitor (oversized monitor recommended)

- MS DOS 5
- Windows 3.1
- Mouse/drivers
- Novell network software
- Network cable to local network

Connection to one of the following via local network:

- KDN (Kennedy Data Network)
- SODN (Shuttle Operations Data Network)
- PON (Payload Operations Network)

Access Request (mail to TSRS, BOC-022):

MSDS Node Information data sheet (copy and sample attached)

KSC Form 28-269, Request for BOC Computer Access (sample attached*)

KSC Form 28-399 NS, Computer User Responsibilities Acknowledgement (sample attached)

For additional information on the MSDS System or requirements for update access to the system, contact TSRS personnel at 867-9014.

* The sample access request form also requests access to HMC&M HMIS, the Department of Defense, Defense Logistics Agency (DoD DLA) Hazardous Material Control & Management, Hazardous Material Information System of MSDS's. This database is provided as a supplement to MSDS, and MSDS's available via HMIS are indicated by "@" in the index.

☐ Check here to be added to distribution of GP23-1 report, "Toxic Substances Registry System Index of Material Safety Data Sheets".

Instructions

Submit the original (manufacturer's) Material Safety Data Sheet (MSDS) whenever possible.

Do not write or otherwise mark on the MSDS. Use this form or a supplement thereto to provide information.

Provide as much information as possible. Contact your supporting cataloging activity for submittal of stock numbers and part numbers and the supply item name.

Provide adequate information to identify the individual to be contacted in the event any discrepancies cannot be resolved by TSRS personnel.

Provide the User MSDS number only if it will be used for identification of the MSDS. Coordinate with your organizational element responsible for the assignment and maintenance of the user MSDS control numbers.

Mail the MSDS/Index Key Submittal form and any attachments to the BOC Environmental Health Services.
